

Environmental Policy

At Olympia Golden Beach, we recognize the urgent need for action against climate change and the importance of reducing greenhouse gas emissions. As a responsible organization, we are committed to adopting and implementing strategies and practices that contribute to environmental protection and sustainable development.

To achieve our goals, we focus on the following key areas:

1. **Energy Reduction:**

We will develop and implement energy-efficient technologies and processes, regularly reviewing our energy sources for alternative renewable or low-emission options. Our aim is to reduce overall energy consumption and promote the use of renewable energy sources.

2. **Water Conservation:**

We will adopt water-saving practices and technologies to minimize consumption and waste. We will promote water reuse and recycling and strive to reduce our water consumption.

3. **Waste Reduction:**

We will implement strategies to reduce our waste, including recycling, reusing, and reducing disposables. Our goal is to minimize waste generation.

Our commitment includes raising awareness among our employees and promoting sustainable practices at all levels of the organization. We will closely monitor our progress and provide regular reports to ensure transparency and accountability.

Commitment to the Protection and Support of Biodiversity

We acknowledge the critical importance of biodiversity for the health of our planet and the sustainability of our natural environment. Protecting biodiversity is not only a moral obligation but also essential for maintaining strong and healthy ecosystems that support life.

With full awareness of our responsibility, we commit to actively supporting and protecting biodiversity through the following actions:

1. **Ecosystem Conservation:**

We will promote practices that reduce negative impacts on natural areas and enhance the conservation of ecosystems through our participation in restoration and protection initiatives.

2. **Sustainable Resource Management:**
We will implement sustainable management strategies that minimize negative impacts on natural resources and biodiversity, preferring sustainable solutions and minimizing the exploitation of natural resources.
3. **Promotion of Environmental Education:**
We will raise awareness and provide education on the value of biodiversity, both within our organization and the community, to support its protection and promote sustainable behavior.
4. **Collaboration with Agencies and Organizations:**
We will collaborate with environmental organizations, local communities, and government agencies to develop and implement joint biodiversity protection programs.
5. **Monitoring and Reporting:**
We will monitor the impacts of our activities on biodiversity and report the outcomes of our actions to ensure transparency and continuous improvement of our practices.

Specifically, We Commit to:

1. **Pollution Reduction:**
 - We will implement strategies to reduce pollutant emissions and waste through the adoption of clean technologies and process improvements.
 - We will promote the recycling and reuse of materials to minimize the amount of waste sent to landfills.
 - We will invest in solutions and technologies that reduce air, water, and soil pollution.
2. **Nature Protection:**
 - We will work with environmental organizations to protect natural habitats and protected areas.
 - We will integrate sustainable development practices into our operations, minimizing negative impacts on the natural environment.
 - We will support initiatives for ecosystem restoration and the protection of natural biodiversity.
3. **Wildlife Support:**
 - We will implement measures to protect and conserve wildlife habitats, avoiding activities that could harm species and their populations.
 - We will participate in wildlife restoration and conservation programs, supporting research and actions for the protection of endangered species.
 - We will promote awareness about the importance of wildlife and its preservation through educational programs and awareness campaigns.

Our commitment to protecting nature and wildlife, as well as reducing pollution, is a core principle of our business strategy. We continuously strive to integrate sustainable practices into our operations and to contribute to environmental protection for future generations.

How You Can Contribute to Our Efforts:

- Recycle newspapers, white paper, glass, aluminum, cardboard, and plastics by placing them in the recycling bin located inside your room.
- Turn off lights when they are not needed.
- Notify reception of any leaks you may notice.
- Reduce water consumption when washing your hands, shaving, or showering.
- Use the appropriate flow button on the toilet flush.
- Unplug electrical devices when not in use.

Please help us protect the environment by reusing your towels and placing them in the bathtub when you want them replaced. This reduces the use of chemicals and water.

Please note that bed linen is changed every third day. If you need them changed sooner, please let us know.

If you need to dispose of any hazardous waste such as batteries, fluorescent lamps, paints, or chemicals, please contact the reception.

Our hotel provides transportation services to and from our beach for your convenience. By choosing more eco-friendly means of transportation, such as cycling or walking (just a 5-minute walk), you can help us improve our environmental performance by reducing fuel usage.

Olympia Golden Beach Resort & Spa, in line with all of the above, implements an environmental management system in accordance with the ISO 14001:2004 standard and is certified by the international body Travelife.

We are committed to continuing our efforts to protect the planet and contribute to a more sustainable and healthier world for future generations.

Best regards,
The Management
