

### Environmental policy

Olympia Golden Beach Resort & Spa actively receives measures for the improvement of the environmental performance decreasing the electricity, waste of water and fuel, it minimizes waste producers and generally contributes to its improvement.

You can also contribute to our effort:

- Recycling paper, white paper, glass, aluminum, cardboard, plastics, throwing them in the basket located inside your room.
- Turning off the lights in case they are not needed.
- Notifying reception of any leaks you notice.
- Reducing water consumption when shaving or bathing.
- Using the appropriate flow button on the flush toilet.
- Unplugging any electrical appliance when is not used.

Please help us protect the environment by using the towels more than once. In order to change them please put them in the bathtub.

We change the bed linen every 3 days. Otherwise, if you wish to change them earlier, please let us know. If you need to dispose of any hazardous waste such as batteries, fluorescent lamps, money, chemicals, etc., please contact the reception.

Our hotel provides transportation services to our beach and back for your comfort. With more eco-friendly products, e.g. cycling, walking (5 minutes on foot), you help us to improve our environmental performance by reducing physical aspects of energy.

Taking into account all the above, the Olympia Golden Beach Resort & Spa applies a environmental management system, according with the requirements of the **ISO 14001:2004** model and is also certified by the Travelife agency.
