

Environmental policy

Olympia Golden Beach Resort & Spa is actively taking measures to improve its environmental performance by reducing electricity, water and fuel needs, by minimizing waste production and by improving the local environment.

You can contribute significantly to our effort by:

- Disposing newspaper, white paper, glass, aluminum, cardboard, and plastic to the basket provided in your room.
- Switching off lights when lighting is not really needed.
- Informing the information desk when you observe any leak.
- Reducing the use of water when shaving or showering.
- Using the appropriate flush type when using the toilet.
- Unplugging any electrical personal equipment when not used.

Please note that towels will only be changed if you place them in the bathtub.

If you need to dispose any potential hazardous waste (such as batteries, bulbs, paint, chemicals etc.) please contact the information desk.

Our hotel offers a transport service from and to our beach for your convenience. By using more environmentally friendly means e.g. cycling, walking (5 min walk), you will help us improve our environmental performance regarding the use of natural resources.

Olympia Golden beach Resort & Spa is taking under consideration all the above and is implementing an environmental management system, according to the requirements of the **ISO 14001:2004** and it is also certified from the international organisation of **Travelife**.
