# Olympia Golden Beach

RESORT & SPA

## Sustainability Report

The **Olympia Golden Beach Resort & Spa** hotel is committed to continuously improve the Environmental Management System, according to the compliance obligations of the relevant European and National Legislation. It recognizes the essential role played by environmental protection in the sustainable development of tourism.

The main achievements of **2021**, regarding the above, were the following:

### SUPPLIERS

Our company, in order to reduce our environmental footprint, has decided to actively support the local suppliers and producers as well as to ensure that our guests will taste the local and authentic products in our restaurants.

### EDUCATION

One of the main goals of our hotel is to inform and train every year our staff to participate actively in the environmental management of the business. Below you can see some pictures from related seminars.

### **Energy and environmentally friendly improvement of the Spa**

**Olympia Golden Beach Resort & Spa** innovates once again, by using the solar energy for the indoor heated pool. Is an original construction, which is extremely environmentally friendly and reduces carbon dioxide emissions into the atmosphere. We try daily to reduce the energy consumption due to our environmental sensitivity.

Besides, the **Travelife** and **ISO 14001** certifications prove our practical effort for a cleaner and greener environment.

**TOTAL POWER CONSUMPTION**

We track all the energy we consume during the season. Below you can see our measurements.

**GAS CONSUMPTION FOR 2020 & 2021  
GAS PROVIDER: FGAS EU A.E.**

YEARS	PROVIDER	LITRES	KILOS	GUESTNIGHTS	CONSUMPTION PER GUESTNIGHT (LITRES)	CONSUMPTION PER GUESTNIGHT (KILOS)
2020	FGAS EU A.E.	28,735	14,332	10,213	2,81	1,40
2021	FGAS EU A.E.	41,050	20,708	15,435	2,66	1,34

**ELECTRICITY ENERGY CONSUMPTION FOR 2020 & 2021  
PROVIDER VOLTERA & ΔEH**

YEAR	CONSUMPTION (Kwh)	GUESTNIGHTS	CONSUMPTION PER GUESTNIGHT (Kwh)
2020	409.257,46	10,213	40,07
2021	518.926,80	15,435	33,62

**ENVIRONMENTALLY FRIENDLY PRODUCTS**

We try to buy only eco-friendly products. In order to achieve that we do the following:

- In 2014 we replaced almost all the old technology lamps in the rooms with low consumption lamps. With this action we have reduced electricity consumption at least **10,000 Kwh** per hour.

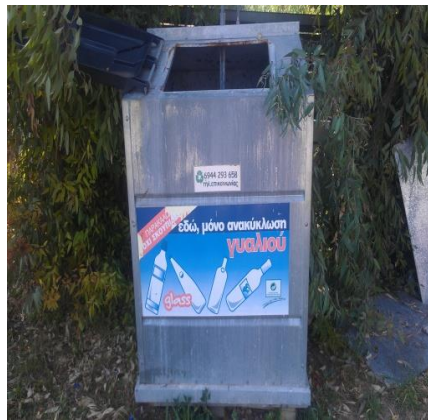

Since 2011, we use only biodegradable materials for the cleaning process and only ecological paints for the maintenance.

- We use recycled paper for the kitchen as well as paper bags, paper cups and paper straws instead of plastic.

## RECYCLING

Recycling is an important issue in today's world. Our hotel has decided to reduce our waste through glass recycling. Almost 100% of our products purchased for our restaurants and bars are glass. To be more specific, we bought 'AURA' water in glass bottles and replaced the old used plastic 'LOUTRAKI' water bottles.

We also recycle the 100% of the batteries we waste.

## REPLACEMENT OF HAZARDOUS MATERIALS

Our hotel tries to avoid the unnecessary use of hazardous materials and products. Therefore, we have replaced all the cleaning products with eco-friendly ones. This is taking place since 2021.

## ENVIRONMENTAL INFORMATION

The **Olympia Golden Beach Resort & Spa** continuously informs our guests and community about our commitment to the environment. We do this by posting a letter with our goals in each room, on announcement boards and in common areas. Additionally, we organize various meetings with the local community in our hotel, in order to present them our environmentally friendly goals, and encourage them to support them. Finally, we have posted our Environmental Policy on well-known websites as well as on our official website.

## **WATER CONSUMPTION**

We try every year to reduce the amount of the water consumption. In the previous two years due to the situation of Covid19 following the required protocol regarding cleanliness and disinfection, we had to consume more water to achieve the highest level of safety and hygiene.

Below you can see the totals annual measurements for 2021.

### **YEAR'S WATER CONSUMPTION (DRILLING) FOR 2021**

<b>YEAR</b>	<b>GUESTNIGHTS</b>	<b>WATER CONSUMPTION (m3)</b>	<b>WATER CONSUMPTION PER GUESTNIGHT (m3)</b>
<b>2021</b>	15.435	16.977,60	1,10

## **LOCAL COMMUNITY**

It is very important for us to have a good relationship with the local community. Therefore, we buy most of our products from local producers and local suppliers. In addition, we want to mention that the 80% of our staff comes from the local community. Many of them have been working at the hotel since the very first day of the opening. We have no complaints from our staff and we always get the best feedback.

Below you can see the annual percentage for **2021** and our contribution to the local community.

<b>BUSSINES EXPENSES</b> (Local Suppliers-Local Producers-Staff Salaries–Municipal Taxes)	<b>CONTRUBITION RATE TO THE LOCAL COMMUNITY</b>
<b>675.000,000 Euros</b>	<b>48%</b>

## **REVIEWS**

The reviews we receive from our visitors regarding to our environmental policy are quite positive and we are proud to have made significant improvement in our environmental effort. That inspires us to implement our future plans for a better environment. The comments of our guests through the questionnaires they fill in also play an auxiliary role.

## NEW ENVIRONMENTAL IMPACT STUDY (2022)

In summary, we would like to inform you that our hotel has submitted for the year 2022 a new environmental impact study. You can check the picture below:
